Meet the penguins

The `penguins` data from the [palmerpenguins](#) package contains size measurements for 344 penguins from three species observed on three islands in the Palmer Archipelago, Antarctica (Horst, Hill, and Gorman 2020).

The plot below shows the relationship between flipper and bill lengths of these penguins from the package of Horst, Hill and Gorman (2020).

Figure 1: Flipper and Bill length

The number of Gentoo and Chinstrap penguins is 192.

Testing the adding function with 22 and 5 gives 27.
